

IT'S *All* ABOUT  
YOU!

## **Finding Your Style**

Imagine starting with a blank canvas and creating an image that speaks to your personality, dreams and desires. Do you feel at ease with a traditional or classic look? Or are you ready to go bold or romantic? Does a more casual and natural style appeal to your true self? Whatever you decide, we can build the wardrobe you desire.

The classic look doesn't just mean Princess Grace Kelly or Jackie Kennedy Onassis. You love the classic and finer things in life. Your wardrobe should reflect a mix of classic elements with rich colors and textures. Added pieces of interesting accessories also speak to your uniqueness.

The Bold look can find a middle ground between eclectic and urban. Rely on clean lines and quality materials to assert your style. The trendier looks will always appeal to you, and fun accessories complete this chic woman.

A romantic is just as comfortable in a lavish dress as she is in her bathrobe. Blend new colors with a bit of glamour. Using ruffled blouses to wear with business apparel still allows you to be true to yourself.

Women who are "athletic clients" are happiest wearing their khaki pants and jeans without any fuss. If you can add one or two pieces and shoes from the classic design, you can pull off a business casual look that allows a professional and successful perception of you.
